

REFERENCE LETTER

Ki Hoon Kang

January 3, 1991

I am writing this letter on behalf of Ki Hoon Kang, who had been a student in my four classes (C, C++, Number theory, Computer Forensics) and a member and the president of a club (H2C), in which studies of computer programming and security related subjects are conducted. I have found that he is a skillful student in the sense of his major and a leader for his peers and members of the club.

Kang is a type of student who always helps out classmates in answering questions, likes to challenge himself, and serves several communities related to information security. When he had a project with classmates and members of the club, he always came up with new ideas actively and cooperatively.

Kang also had interest outside of academics. He had been an active member of a volunteer group, such as overseas volunteer work in the KTIT. He has a great job in such activities and he is a person who loves to meet new people with various backgrounds. He expressed his eager to pursue internship program when I personally talked with him.

In conclusion, I give him my highest recommendation. He will be an outstanding internship participant. Should you have any questions regarding this matter, please feel free to contact me any time by the following information.

Professor Hwankoo Kim, Ph. D.

Division of Computer & Information Engineering,

Hoseo University
